

PRESS RELEASE

MagicDraw RConverter 1.0 is released! Now any Rational Rose models can be exported into MagicDraw without size limitations

Golden, Colorado – August 11, 2005. No Magic proudly presents MagicDraw RConverter 1.0, the latest product add-on for the award-winning UML modeling tool, MagicDraw UML. MagicDraw RConverter 1.0 provides a seamless way to convert Rational Rose Model file format (*.mdl) to MagicDraw-supported file format (*.xml).

Benefits of MagicDraw RConverter 1.0

- **Minimal migration costs to open standards:** MagicDraw RConverter offers a cost-saving alternative to your software development needs. Our tool allows your software developers to convert their UML diagrams into open standard Object Management Group (OMG) compliant XML format, thus opening up the door to more software choices for your future IT investment.
- **Full support for all UML diagrams:** MagicDraw RConverter allows you to convert these UML diagrams into MagicDraw: Activity, Class, Collaboration, Component, Deployment, Sequence, State chart, Three-tiered, and Use Case diagrams.
- **Powerful converter:** MagicDraw RConverter is the most comprehensive tool to convert Rational Rose formats to MagicDraw or other open formats available in the market. MagicDraw RConverter also provides the capability to automatically generate the vast majority of symbol properties, specifications, diagram layouts and stereotype images.
- **Ease of use:** MagicDraw RConverter provides you with a simple conversion process. Our illustrated manual will guide you through the conversion process step by step. All it requires of you is to choose and click the .mdl file of your choice, and relax. Our tool will do the conversion into .xml in a fraction of seconds.

Visit www.magicdraw.com to view our online demonstration!

Rational Rose 2003 users will find it easy to convert this Rational Rose 2003 files into .xml files supported by MagicDraw version 9.0 or higher.*

*MagicDraw RConverter is specifically created to enable current Rational Rose 2003 users to convert their files with .xml and thus works as Rational Rose 2003 plug-in.

About No Magic

Founded in 1995, No Magic Inc. is headquartered in Golden, Colorado with operations worldwide. In 1998 No Magic released MagicDraw UML version 1.0, the first large scale application completely developed in Java, earning Sun's "100% Java Application" credential. In addition to continued development of MagicDraw, No Magic, Inc. also provides software development outsourcing services from its software development facilities in Kaunas, Lithuania and Bangkok, Thailand.
